

1200 series

Excellent materials and stylish design guarantee the 1200 series a future at the forefront of the video door entry system market.

The new AISI 316 (V4A), 8/10 thick embossed stainless steel entrance panel can be flush mounted with backbox type 9092 and 9093, or surface wall-mounted using an AISI 316 (V4A), 15/10 stainless steel mount.

The entrance panel has a stainless steel front with two, die-cast aluminium header pieces to fasten the front to the frame using a special ELVOX screw. The frame is also stainless steel.

The call buttons are attached to the front plate of the entrance panel with a clear, polycarbonate, tamper-proof support. The clear, polycarbonate buttons are protected by a stainless steel cover. Two slots in the button cover provide excellent backlighting.

The entrance panel is compatible with ELVOX digital and analogue systems. The audio and video versions are identical externally to create a single solution for both applications.

The protection class for this series is **IP44**
